

iCon[®] FLATLINE / MSGS M200

- Seamless integration with popular existing fixtures
- For water and solvent-based coatings
- Superior atomization delivers world-class finish results
- Easy maintenance, including tool-less access for MSGS-M200 spray gun
- iCon Flatline pump available in 32:1 or 36:1

The Perfect Combination for Automated Applications.

Pair the MSGS-M200 Automatic Multi Spray Gun with the iCon Flatline Pump for a streamlined finishing system built around consistency, control, and reduced maintenance. The MSGS-M200 delivers exceptional atomization and high-quality results at lower air pressures, minimizing overspray and repeat passes while offering tool-less access for quick changes.

Matched with the iCon Flatline Pump, available in 32:1 and 36:1 ratios for both waterborne and solvent-based coatings, expect steady material delivery across multiple automatic guns, self-adjusting packings for long service life, and simplified priming and cleanup. Together, they create a versatile, efficient solution engineered to optimize your automated coating process.
